

1r Saló del **Biogàs i Tractament de Purins** VIC. 18, 19 i 20 d'Octubre de 2018

PRESENTATION

The pillars of the new European framework for 2030 on energy and the fight against climate change are, the reduction of greenhouse gas emissions by 40% below the level of 1990, the binding objective of the EU to achieve at least 27% of renewable energies and, more ambitious policies on energy efficiency.

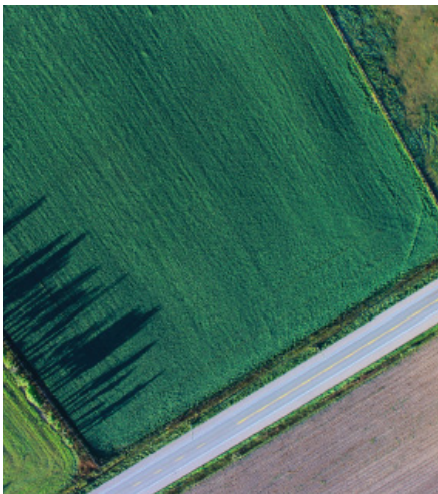

In this regard, the National Agreement for energy transition in Catalonia establishes a long-term objective to maximize the use of indigenous renewable energy sources in order to achieve a 100% renewable energy model, thus reaching an economy that does will not depend on fossil fuels by 2050.

Accordingly, the Biogas Show has been designed to promote and publicizing all kind of actions focused to develop management and treatment of livestock manure with the aim of improving environmental management, emission of greenhouse gases such as Methane (CH₄) and Ammoniac (NH₃).

Initiatives such as the Biomass Fair and the Biogas & Treatment of Purines Show offer a meeting point between main players in the sector and encourage synergies between companies in these new sectors, thus generating boosting growth of this new market and contributing to achieve objectives set on this subject matter.

PLACE, DATES & TIMES

The Saló del Biogàs i Tractament de Purins (Biogas & Treatment of Purines Show) will be held within the framework of the Fira de Biomassa de Catalunya (Biomass Fair of Catalonia), at the fairgrounds El Sucre in Vic (Barcelona) on October 18, 19 and 20, 2018.
